Digital Website and Marketing Operations

Version: DEMO-1.0 | Effective: 28 October 2026 | Owner: Demo Support Operations

TEST DATA ONLY. These policies are fictional examples created to test RAG retrieval, citations, routing and escalation. Replace with reviewed company policies before real-world use.

Website content requests

1. Submit a content request with page URL, proposed copy, asset links, business owner and desired publication date.

2. All public-facing website changes require editorial review and authorized publishing approval.

Website troubleshooting

1. For a broken contact form, record the affected URL, timestamp, browser and non-sensitive error details.

2. For a full website outage, escalate immediately to Digital Operations and IT incident response.

3. Do not request passwords or personally identifiable visitor submissions in the support chat.

Campaigns and analytics

1. Campaign requests should include audience, channel, objective, launch date, approved budget and content owner.

2. Analytics access is granted only after authorization and the minimum necessary role assignment.

3. Marketing claims, customer data exports and budget increases require approval from the responsible owner.

Escalation

1. Publishing requests, advertising budget changes and access to restricted analytics require human approval.

2. If no approved digital policy exists, open a ticket rather than inventing a process.

RAG evaluation: Answers should cite this document and the relevant section. If the document lacks a fact, state that it is not available and offer escalation.
